

Introducing TentaConsult Italia: The new consulting hub of the Tentamus Group in Italy

The merger of Pegaso Management Srl and Isemed Srl creates an integrated consulting company combining expertise in regulatory affairs, sustainability, innovation, and medical devices.

Ravenna, 1 July 2026

Tentamus Italia Group proudly announces the launch of **TentaConsult Italia**, its new consulting company established through the merger of **Pegaso Management Srl** and **Isemed Srl**, two companies already part of the Group and widely recognised for their expertise in management consulting, sustainability, innovation, regulatory compliance and medical devices.

The merger represents a strategic milestone in the Tentamus Group's growth and integration strategy in Italy. Its objective is to strengthen the Group's portfolio of high-value consulting services by providing businesses with a single, trusted partner capable of supporting them in addressing the challenges of business development, regulatory compliance and the enhancement of products, processes and organisations.

TentaConsult Italia combines the experience of **Pegaso Management**, founded in 1998 and specialised in management and organisational consulting with a strong focus on the agri-food sector, sustainability, management systems and process improvement, with that of **Isemed**, established in 2008 and specialising in technical and regulatory consulting for the marketing of medical devices, in vitro diagnostic medical devices (IVDs), cosmetics and biocidal products in international markets.

The new company will maintain its operational offices in **Ancona** and **Imola**, ensuring continuity for existing clients while expanding its capabilities through a broader, more integrated and cross-disciplinary service offering. With the establishment of TentaConsult Italia, the Tentamus Group further strengthens its position as a trusted partner for companies operating in increasingly regulated, competitive and sustainability-driven markets. Its services range from food safety and environmental sustainability to ESG consulting, management systems, process and product innovation, regulatory affairs and certification support.

*"Our goal is to strengthen the identity, visibility and value of the expertise already existing within our Group" said **Nicola Berruti, Country Manager, Tentamus Italia & UK**. "The merger of Pegaso Management and Isemed enables us to create a highly specialised consulting hub capable of supporting Italian and international companies through an integrated, technical and value-driven approach. This is an important step forward, bringing together complementary expertise and reinforcing our ability to support clients not only through analytical services, but also in regulatory compliance, sustainability, innovation and market access."*
